

The diagram illustrates a data packet structure. It consists of a horizontal bar divided into four segments. The first segment is labeled 'IFS' and is white. The second segment is labeled 'Header' and is light gray. The third segment is labeled 'DATA' and is light gray. The fourth segment is labeled 'IFS' and is white. To the right of the fourth segment, there are four black dots, indicating a continuation of the structure. The entire structure is enclosed in a black border.
